VLADYSLAV BONDARCHUK

FRONTEND ENGINEER | React · Next.js · TypeScript | Remote · Ukraine | English C1

LinkedIn | Portfolio | GitHub | Telegram | nothinghardforyou@gmail.com

PROFESSIONAL SUMMARY

Frontend Engineer with **4+ years** of experience building production web applications using **React, Next.js, and TypeScript** across **FinTech, InsurTech, and EdTech**. Focused on complex, data-driven interfaces, frontend architecture, API integrations, and performance. Experienced in end-to-end feature delivery and AI-native development workflows, with ownership of technical decisions and code review.

TECHNICAL SKILLS

Core: JavaScript (ES6+), TypeScript, React, Next.js, React Router, HTML5, CSS3/SCSS, SSR, SSG, App Router, Server Components, Server Actions

State & APIs: Redux Toolkit, RTK Query, Redux Thunk, Zustand, TanStack Query (React Query), REST, GraphQL, Apollo Client, Axios, OpenAPI, WebSockets

Forms & UI: React Hook Form, Formik, Yup, Zod, Tailwind CSS, Material UI (MUI), CSS Modules, Styled Components, Bootstrap, shadcn/ui, Radix UI, Storybook

Architecture & Performance: Frontend Architecture, Reusable Components, Custom Hooks, Responsive Design, Accessibility, Code Splitting, Lazy Loading, Core Web Vitals, SEO

Testing: Jest, React Testing Library, Playwright, Vitest, Mocha, Chai, Unit & E2E Testing

Tools & DevOps: Git, Vite, Webpack, GitHub Actions, Azure DevOps, CI/CD, Sentry, Datadog, Figma, Jira

AI Development Tools: OpenAI Codex, Claude Code, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

Cogitize Solutions | Frontend Engineer

Jul 2026 – Present

- Developed and maintained FinTech web applications using React, Next.js, and TypeScript, working across multiple product areas.
- Built interfaces for financial operations, integrating transaction and account data to support customer workflows and operational visibility.
- Implemented authentication and account security features, including active-session management, to give users greater control over account access.
- Introduced service-status messaging and notification workflows to keep users informed about service availability.

Radity | Frontend Developer

Mar 2024 – Jun 2026

- Built and enhanced InsurTech web applications using React, Next.js, and TypeScript, taking frontend functionality from implementation to production release.
- Implemented a complex, data-driven form workflow from scratch using Formik, Yup, and TanStack Query, featuring dynamic rendering, conditional logic, and asynchronous API integrations.
- Improved application completion and user experience by implementing flexible input handling and fallback mechanisms, eliminating critical blockers in customer workflows.
- Optimized CI/CD pipelines by introducing parallel Playwright E2E test sharding in GitHub Actions, reducing test execution time by ~33% and accelerating regression feedback before release.

Upwork | Frontend Developer

Nov 2022 – Mar 2024

- Developed interactive learning experiences for an EdTech platform using React and TypeScript, including content summaries, user discussions, and audio playback, enhancing content accessibility and user engagement.
- Migrated Sendbird Chat SDK from v3 to v4, refactoring legacy integrations and removing unused functionality to improve chat initialization performance by ~25%.
- Implemented client-side media workflows for image uploading, cropping, and drag-and-drop interactions, simplifying content creation and sharing across the platform.
- Built site-wide content search, improving content discoverability and reducing the time users spent navigating educational materials by up to 30%.

EDUCATION

Military Institute of Telecommunications and Informatization, Kyiv | Master's Degree in Cybersecurity | 2016–2021
